TEACHER CHANGE

HELP TO EMPIRE

LONDON, July 15.—The Duke of York informally opening the triennial conference on education of the League of Empire at University College yesterday, expressed the opinion that the league's scheme for the interchange of teachers was of great service to the empire.

It necessarily would be some time, he said, before the full benefit thereof could be felt, but it was certain that the labor expended in this connection would be more than justified.

Lord Parmoor, the chairman, also dwelt on the value of the interchange of teachers, which he characterized as an encouraging interchange of educational ideas between all parts of the empire.

WILL MEET HERE ON
 OCTOBER 16TH TO 19TH

A meeting of the Rocky Mountain Branch of the Canadian Mining Institute was held at the Greenhill Hotel here on Tuesday of this week, and when the question of the next convention of the Canadian Institute of Mining and Metallurgy was considered and it was decided to meet in Blairmore for three days in October, and it was assured by Mr. Davidson that the Department of Public Works' immediate purpose was to complete that portion of the transcontinental highway between Maple Leaf and West Coleman before winter sets in.

The meeting on Tuesday was presided over by Mr. George Kellock, of Coleman. There were present: Mr.

WILL COMPLETE TRUNK ROAD FROM MAPLE LEAF TO COLEMAN

Mr. R. B. Davidson, provincial government road commissioner, paid a visit to the Pass this week and yesterday afternoon held conference with a number of citizens on matters respecting the Pass roads.

Various problems were discussed for more than three days in October, and it was assured by Mr. Davidson that the Department of Public Works' immediate purpose was to complete that portion of the transcontinental highway between Maple Leaf and West Coleman before winter sets in.

Plans have been drawn and tenders

submitted for the work will be called for at Luke Lindoe, Mr. A. Davis, and Mr. once. The road when completed will be as required by the co-operative G. A. Vissac, Mr. Raoul Green, Mr. plan between the federal and provincial Allan Hamilton, Mr. M. Johnson, and local governments, surfacing to be similar Ed. Royce, of Blairmore, Mr. L. to that of the new road over the P. Robert, of Bellevue; Mr. W. Stev. Frank Slide.

enson, junior of Hillcrest; Mr. John T. Sterling and Mr. W. Cashman, of Edmonton; Mr. Lewis Stockett, of Calgary; Dr. Rose, Mr. J. Thornt, of Lundbreck and also the Coleman of the Ottawa geological survey department, and his assistant, Mr. R. the International Coal Co. and the government.

Mr. Davidson felt that the best the department could do with the Passburg to Lundbreck road this year would be to scarify and remove the loose boulders.

Under the federal-provincial cooperative plan, the provincial government guarantees maintenance somewhat similar to that in effect in British Columbia.

There were present at the meeting, which was held at the Greenhill Hotel, Mayor McLeod, P. M. Christophers, M.L.A., Messrs. J. A. McDonald, L. L. Morgan, W. A. Beebe, J. E. Gillis, W. J. Bartlett, Dr. Olivier and others.

BLAIRMORE TO GET \$20,000

An official from Ottawa was in town last week end to look over the grounds with a view to planning how and where to spend the \$20,000 voted by Ottawa towards repairing damage done in the neighborhood of Blairmore by the floods last year.

We understand that of the \$21,500 voted \$20,000 is to be spent here and \$1,000 in the vicinity of Okotoks.

It is not the intention of the federal government to reimburse the town for any portion of the money already spent by the town upon such work, but the \$20,000 will be an additional expenditure.

It is expected that work will commence in the very near future.

The town is also looking forward to some assistance from the provincial government.

While we have not the exact figures at hand, it is estimated that the Town of Blairmore has spent in repairs to bridges and other property, replacing river cribbing, etc., at least \$6,000, provision for which was not made in the estimates for the years 1923 or 1924.

UNSWORTH-BIXBY

A quiet wedding was solemnized at the Central Methodist church in Spokane Wednesday evening, July 16th, when Austin Beatrice, eldest daughter of Mr. and Mrs. W. D. Bixby, of Warner, Alberta, and Mr. Percy Locke Unsworth, of Coleman, Alberta, were united in the holy bonds of matrimony, Rev. L. Morgan Chamber, D.D. officiating. The bride was attended by her sister, Miss Jennie Bixby, of Spokane, and Miss Grace Fitzpatrick, of Lethbridge, Alberta. The bride and groom will reside in Coleman.

The council of Red Deer are undecided as to whether or not they should tax the Parish Hall, an annex of St. Luke's Church, which the church board claim is church property and not subject to taxation.

THREE MILLIONS

FOR INDIAN WORK

poses and \$75,029 to assist young Indian students to set up for themselves and also to make loans to Indians for the construction of homes. Hon. Charles Stewart, Minister of the Interior, gave a speech at the House of Commons, of this amount \$1,854,000 was for educational purposes.

Success Begins With Saving

A Savings Account with the Union Bank of Canada will give you the right start.

By systematic saving you can lay the foundation stone of future success.

Do not wait until you have \$25.00 or \$50.00. A Savings Account can be opened with \$1.00.

(Continued)

"Oh, Sergeant Scarlet, please do keep an eye open for my very pretty brother, also Rudeau Street, or whatever you call the thoroughfare which passes your headquarters."

"And I'll have him passed at Chateau Laurier and ask for him out at Britannia Park," he managed to answer, tiring of the talk of his schooling. "But he had a good, or for the jest, mindful of the change that soon must come to her happy mood."

He entered the police shack by the back door and was soon in a room on Olympe. His prisoner, the Lady Franklin oblivious of his fate, seemed to revel in the luxury of the guard room's warmth. The sergeant went through with the fresh wine.

"Rudeau Strict, indeed," ran his thoughts. "What a name for that street through the snow in Armstinct!"

At that, Moira showed her Ottawa, for Rudeau is the street on which face the red brick headquarters of the Royal Canadian Mounted Police who had just left the capital! Would that be could wait her home again, sacrifice thought that would be in this ice-bound isolation!

Stamps were torn from the envelope she took the seal upon the door as was his right. Again his eyes were upon all that remained of her "merry brother." He wondered about death and the hereafter, and various things he never should enter a Mountie's mind—not when he's stationed north of Sixty-Six.

Then, suddenly, his eyes seemed to open as though a mote had been cast from each. Perhaps this was effected by the magic of Moira's charm and beauty. Certainly he saw details that had not impressed him the previous afternoon.

As might a wolfish instinct of hunting him, he crept upon the floor for the key that lay on the sleeping bench beside the murdered youth—left in such a way as to indicate its purchase. But he did not dare to open it, nor studied the set of the bar and sniffling at the tampon on the inner side. His eyes widened as he held the beautiful exhibit before him and realized the possibility of his having been led to this definite clue.

"Magic skin," he murmured half after the fashion of men who find themselves lost in the wilderness. "You widen the mystery; may you help to close it!"

more, in his capacity of magistrate, held him to trial.

They were ready then for the second examination of the coroner's inquest into the death of Oliver O'Malley. As Karmack was to be the most important witness, a change was made in the jury by substituting for him the recent arrival from Ontario. Now these two, and his comrade citizen Seymour went down the hall to the hut which Arvid had occupied. That Karmack elected to sit by the stove in the hall, and the two others remained caused the coroner-surgeon to feel rejoicing. He saw to it that La Marr did not enter the hut. The jury, seeing that the coroner was the only one to miss the fox-teeth crows which he had appropriated that morning.

Karmack and the Eskimo related what had been said Arvid the next day, the only testimony. What they held sufficient on which to find a verdict against the fox hunter and when the fastidious lawyer had read the coroner's court, was disbursed closed.

The saddest task of the day was at hand—one from which these strong men of O'Malley's fingers from the block for probably the last spell of ostensible contention. Close examination of this showed the same conditions to exist.

Neither of the totes had been trapped in theaceous winter, there had been cured at least a year.

"Magic skin," he repeated, and breathed a wish too fervent for utterance even in the hut where he stood alone.

In the act of wishing, memory put his finger to his chin. There came to mind the skins of a hare, a great fan of the venerable myth, and wished again, more fervently even than before that it would fall to his lot to unravel the great mystery of the Oliver O'Malley murder.

Opening the peacock of his winter uniform, he tucked both hands behind his head. "I'm a fool," he said, "but I'm a fool." He had intended to appropriate the silver and black treasures for his own gain, he scarcely need have hidden them more carefully.

Perhaps Seymour had best cease wishing. But he did, received his clutch of skins in hand, a great fan of the venerable myth, and wished again, more fervently even than before that it would fall to his lot to unravel the great mystery of the Oliver O'Malley murder.

In the act of wishing, memory put his finger to his chin. There came to mind the skins of a hare, a great fan of the venerable myth, and wished again, more fervently even than before that it would fall to his lot to unravel the great mystery of the Oliver O'Malley murder.

"What are you thinking?" he asked.

"After Avic. I'm just waiting for you to issue the warrant. You promised me the chance at him you must remember."

"But why to-night?"

The constable gave him an impatient glance. "I can make out no reason for your being here," he said, "and I'm not on duty. The King's business is before the court. The native holder was holding them in waiting. Inside he found La Marr seated on the floor, pacing the floor like some animal.

"I'm here to see you," he said.

"After Avic. I'm just waiting for you to issue the warrant. You promised me the chance at him you must remember."

"But why to-night?"

"I'm here to see you," he said.

"After Avic. I'm just waiting for you to issue the warrant. You promised me the chance at him you must remember."

"But why to-night?"

The constable looked startled. "You don't mean—why it's an open-and-shut case. The coroner's jury—"

"Please come back to live," that all Good Luck."

La Marr squared himself for a formal audience and went out into the gathering dusk.

"There's nothing so kingly as kindness," he said.

And nothing so royal as truth;" and you know,

"So may we in bonds of love,

Such virtue measure high,

And make them gentle as a dove,

If we are only kind."

There was something very attractive about the man, the constable noted. He was that for we live in lands where Jesus has been heard of, and he has filled the earth with kindness.

"If you are that, then I have the power to confer on you titles, and although you may not put the letters after your name, you can if you care to—William Karmack, K.C."

"K" stands for kindness, and you know.

"There's nothing so kingly as kindness," he said.

And nothing so royal as truth;" and you know,

"So may we in bonds of love,

Such virtue measure high,

And make them gentle as a dove,

If we are only kind."

Courtesy means being courteous; that is, to stand in a court and not be ashamed of your actions. Here is a gentleman, a real gentleman, and I wish I could say the same for the rest of the world.

"A gentleman is clean inside and out—a man who looks neither down nor up in a court, and not be ashamed of your actions. Here is a gentleman, a real gentleman, and I wish I could say the same for the rest of the world.

"A gentleman is clean inside and out—a man who looks neither down nor up in a court, and not be ashamed of your actions. Here is a gentleman, a real gentleman, and I wish I could say the same for the rest of the world.

WORLD HAPPENINGS BRIEFLY TOLD

With their arrival in Paris the United States flyers had travelled 18,055 miles in 118 days with 229 flights flying time.

Sir Sidney Russell-Wells, 55, the famous heart specialist and Conservative member of Parliament for London University, died suddenly July 14.

A memorial is to be erected at the Elliston racecourse, near Berlin, for the 21 professional jockeys and the 111 racehorses who were killed in the war.

The date of the departure of the Prince of Wales for Canada has been definitely fixed as Aug. 25. It is now understood, The Prince will call on the Berengarids.

Narcotics, valued at more than \$1,000,000, were seized, and nine members of the crew, including the captain, of the Italian-American liner Dullo, were taken into custody following a raid on the vessel at New York.

Three emeralds and four .22-calibre cartridge shells were found in a bag which Mrs. Betty Smiley bought, live weight, in the market at Minneapolis recently. The stones were extremely valuable.

An agreement under which fishermen from the Hebrides Islands will come to the coast of British Columbia probably will be completed in the near future, according to Hon. T. D. Patullo, Minister of Lands.

Andrew Jenkins, who, as a result of hisfeat of having ridden a bicycle on a rope over the Niagara Gorge in 1880, was considered one of America's greatest tight rope performers, died at Galt, Ont., recently in his eightieth year.

Fish Freezing Plant
A modern fish freezing plant will be installed at Lesser Slave Lake with a capacity of 150,000 lbs. of fish, for the further development of the fishing industry in this lake, it is stated.

Have You Tried The New Cuticura Shaving Stick?

This delicately medicated antiseptic soap is a rich creamy lathering soap which easily removes the slightest irritation. Indispensable for those who shave twice daily. Properly used, it will prevent irritation and keep the skin smooth. Price 25c. Sold everywhere or mail-order post receipt of price by Canadian Dept. "Cuticura," P.O. Box 2616, Montreal.

New Discovery Routs Chicken Lice

Mineralized Water Gets Rid of Dusting or Spraying Fins for Baby Chicks and All.

This wonderful product keeps the poultry free from vermin, enabling you to keep your flocks healthy and happy. It is the simplest, easiest, surest and best method ever discovered.

Lice-Go, which is the name of this remarkable lice remedy, is dropped in the chicken water. It is a safe, non-poisonous system of the bird. It comes out through the pores of the skin and does not injure the feathers. It kills lice and their eggs and leaves the body. It is guaranteed to help rid the flocks of lice and dust mites. It is harmless to chicks and does not affect the taste of the meat. Treatment at the start and then a little added to the water every few months is all that is necessary.

"The figures speak for themselves. Lice-Go and do not want to be without it."

With a box 25c. Address: Alton, Ill. "The Lice-Go tablets worked wonders on our chickens, my neighbors all said so."

Send No Money—Just Send Name and Address. We will send you a sample of Lice-Go to test. It will get rid of every bird louse and dust mite. Large double strength \$1.00 package, enough for your postman only \$1.00 and few cents postage. If you are satisfied, money will be refunded without question or argument.

2 1/2 lbs. price, \$2.00. Sell two have your own. "Lice-Go" can be sold by Distributors. Box 11-K, WIANTON, ONT.

W. N. U. 1344

Immigration Increasing

New United States Quota Law Will Prove Benefit to Canada
(By Norman S. Rankin)

Canada stands to benefit materially by the new United States immigration quota law which comes into effect at midnight on July 30th. It will be of advantage to the Dominion in two ways, first, by the very considerable reduction of all quotas, and second, by the provision that restricts immigration from Canada by barring out all but Canadian-born or Canadian citizens resident in the Dominion for five years or more, as compared with the present regulation that practically puts a one-year resident in Canada on a par with a bona fide Canadian citizen.

A study of the new Quota Law indicates that while the year just ending permitted an immigration into the United States of 357,502, under the new law the total will work out at 161,990, or less than half the previous figure. It is further apparent that all countries except France, which never reached its quota, will have exhausted their quotas for the year, certainly before it is half over, and that the remaining prospective emigrants will require, as an alternative, to consider the prospects and possibilities of Canada, contiguous to the United States, as the country most suited to their requirements.

Under the new law requiring a five years' residence in Canada this country will cease to be the stopping-place for Britons and Europeans destined to the United States as their permanent place of residence, which will doubtless cause more United States steamship companies to divert their lines to Canadian ports, and already, for example, the Swedish-American, the Norwegian-American, the Holland-American, the Scandinavian-American, the Royal Mail-Saint-Packet and the Italian lines have altered their routes.

As soon as the provisions of the new law become effective, July 1st, persons of all nationalities, except Canadian-born, will be required to procure an immigration visa at a cost of \$10 and will have to pay 40¢ U.S. Immigration Commissioner's fee and head tax. After the visa has been obtained each intending immigrant is subject to the regulations as applied by the U.S. immigration authorities. Such aliens are also subject to the quota of each nationality as laid down in the new law, and the additional pertaining to the quota of each national pertaining to be admitted from Canada should have not yet been completed.

Canadian-born people will not be subject to the quota. Those going to reside permanently in the U.S. will require, however, both immigration visa and head tax receipt, but those going on business or pleasure will continue to be admitted without visa or head tax solely at the discretion of the U.S. immigration authorities in Canada. Little difficulty is anticipated in applying the law so far as Canadian-born are concerned. The main question facing U.S. authorities here is the issuance of visas to persons not Canadian citizens immigrating in anticipation of a chance to cross the border.

The following are the estimated immigration quotas from the principal European countries, based on 2 per cent of the 1890 census with a minimum of 100, as compared with the immigration figures under the present law, the latter figures in each case, representing admissions under the new law:

Austria, 7,340-990; Belgium, 1,563-509; Czechoslovakia, 14,367-1,873; Denmark, 5,619-2,782; Finland, 3,21-145; Germany, 6,767-50,139; Great Britain, 77,342-62,458; Hungary, 5,747-483; Italy, 42,067-3,889; Sweden, 5,699-5,872; Switzerland, 3,607-1,637; Norway, 12,502-6,452; Poland, 21,911-1,631; Romania, 24,405-1,752; Yugoslavia, 5,426-725; Turkey, 2,654-100.

The flow of immigration, current year, 1924:

Total Increase over 1923
Month British U.S. Percent.

Jan. 1,044 846 4,342 66
Feb. 1,865 994 6,105 85
Mar. 5,882 1,041 12,452 92
April 3,410 1,538 19,329 102

Canadian immigration for the first four months of the present calendar year is encouraging and represents a total of 42,310, an increase of nearly 100 per cent over the past year and 157 per cent over that of 1922. In addition, published Government figures indicate that the return movement of Canadians in the United States is in evidence and that during two of the late spring months over 3,000 have re-crossed the border.

The Canadian immigration of old which was the main form of communication up to the present will be replaced by civilization's newest and most efficient creation, the wireless telegraph. Thus the adage still rings true—"The old order changes, giving place to the new."—Edmonton Bulletin.

The Canadian immigration of old which was the main form of communication up to the present will be replaced by civilization's newest and most efficient creation, the wireless telegraph. Thus the adage still rings true—"The old order changes, giving place to the new."—Edmonton Bulletin.

The man can gain more practical experience from poverty in ten days than he can from riches in ten years.

Would Pool Farm Products

Provincial-Wide Co-operative Marketing Scheme Planned For Alberta

Preliminary steps looking to the ultimate formation of a provincial-wide co-operative marketing organization to handle, on a co-operative basis, all products making basis, all products of the farm were taken at Calgary by the co-operative marketing committee of the United Farmers of Alberta. This committee was formed at the last annual convention of the U.F.A. The success, which during the last few years, has been achieved by the co-operative marketing organization in the Pincher Creek district, where practically all farm products are placed on the market by this method, was brought up as an example at the meeting. No official statement would be issued by the committee, but it was learned that only preliminary work had been accomplished.

The Pace That Kills

Speed Mania Gaining Dangerous Hold On Young and Old

It is an unquestionable fact that the speed mania and "craving for speed" are gaining dangerous hold on both young and old people today. Only is unusual, the sensational, the swift, moving are regarded as interesting. Plain living and high thinking, if possible under modern conditions, hold no attractions. There is a primary drift with the present generation, as President Coolidge said recently, to establish "a full conception of the obligation to reasonableness and moderation." The foolish pursuit of thrills and the futile effort to "get a kick" out of life will, perhaps in a short time be seen in these true nature. But the wreckage of delusions already have left behind them depressing—Kansas City Star.

Wheat Crop Estimate

Considerable Reduction Is Shown In Preliminary Estimate

Preliminary figures issued by the Bureau of Statistics estimate the Canadian wheat crop for this year at 318,640,000 bushels. The crop last year was 474,999,992.

Estimated yields in bushels for wheat, oats, barley and flax seed are:

Prairie

Crop Province All Canada Wheat 300,530,000 318,640,000 Oats 267,800,000 423,623,000 Barley 49,966,000 66,217,000 Flax 6,031,000 6,136,000

The indicated yields are subject to change due to any subsequent revision of areas sown, and also to the effects of the season between June 30 and harvest.

Use War Explosives

U.S. Farmers Clear Land and Remove Stumps With Picric Acid

More than 45,000 American farmers in twenty-eight states have used war surplus picric acid to clear 250,000 acres of land and to remove stumps from about 85,000 acres, according to the American Chemical Society. Nearly 8,000,000 pounds of this explosive have been applied to agriculture by the United States Bureau of Roads.

It is estimated that the saving to the farmer over the cost of commercial explosives has amounted to \$750,000, but the actual benefits have been more far-reaching, as thousands of small farms have had the acreage of cultivable land increased.

No child should be allowed to suffer an hour from worms when prompt relief can be had in a simple but strong remedy—Mother Graves' Wox Extract.

The last frontier is gone

Wireless in the Far North Supplanting Old Methods of Communication

A party of Government officials recently passed through the city enroute to Fort Simpson and Fort McPherson, where they are going to establish wireless stations which will be the beginning of a wireless system that will extend across the whole of the lone lands of the north within reach of the populated centres.

The moose-horn telegraph of old which was the main form of communication up to the present will be replaced by civilization's newest and most efficient creation, the wireless telegraph. Thus the adage still rings true—"The old order changes, giving place to the new."—Edmonton Bulletin.

The man can gain more practical experience from poverty in ten days than he can from riches in ten years.

The Pollard Boy Scouts have introduced complete prohibition against alcohol and tobacco into their organization.

After a moment's thought the little fellow asked: "Well, what's the matter with getting me a scooter?"

A man can gain more practical experience from poverty in ten days than he can from riches in ten years.

Divers Find Vessels In Undersea Jungle

German Ships Sunk At Scapa Flow Overgrown With Seaweed

Great difficulties are being faced by the divers who are engaged in salvaging the German warships scuttled at Scapa Flow in 1918. When the divers first went down they found huge tangles with stakes as thick as a man's wrist and with leaves 18 inches broad and 15 feet in length growing over parts of the vessels' sides. They had to slash through this jungle of seaweed in order to reach the doors and port holes.

Chief Diver Mackenzie declares he has never seen anything of such dimensions. Great barges have been hacked away from the sides of the ships with axes. When he entered the Hindenburg a diver found champagne bottles and glasses in the officers' quarters. The engines and interior of the ship are intact, and the bulkheads undisturbed. A curious fact is the entire absence of fish in Scapa Flow. Crabs and lobsters abound, but other kinds of fish have been scared away.

Pact Accepted By U.S.

Agrees to Terms of Tangier Convention Under Certain Conditions

The United States has informed the Governments of Great Britain, France and Spain of its willingness to accept under certain conditions to the Tangier convention signed at Paris on December 18, 1923.

The conditions, in brief, would require a more detailed interpretation of certain provisions of the convention, which are set out in the United States rights in the Tangier zone and the substitution of a joint administration authority.

The Tangier convention, as consummated in Paris, provides for the abrogation of extra territorial rights of foreign nations in the Tangier zone and the substitution of a joint administration authority.

The Unity and Strength Which We Know As the British Commonwealth

But, for world peace, for the very salvation, it may be, of a pacific civilization, this world, and especially the first condition in the common union, is the unity, the unity and strength which we know as the British Commonwealth.

In so far as the British Institute of Foreign Affairs capably cements for this and helps in fit it with a common purpose, it will render a service which may well prove invaluable. It has been established now for three years and has done excellent work, but fresh fields of activity continue to open before it and it needs additional support. That should not be denied. —Manchester Guardian.

Milner's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. There are a strengthening and stimulating properties in the worm powders which are of great value in the disorders of digestion that the worms cause and imparting a healthy tone to the system most beneficial to development.

Floral Medal Offered

The Canadian Horticultural Council

will award a gold medal annually for the best new variety of florist's plant recorded with the council during the year. This has been made possible through the generosity of the Canadian Florists' and Gardeners' Association which donates the medal. The Registration Committee of the council will judge the entries.

WHERE THE MONEY GOES

(Extracts from Hansard)

Questions by R. B. Hanson, answers by Hon. Mr. Copp:

How long has the Hon. William

Puglsey occupied the position of in-

vestigator of War Claims?

Appointed 13th March, 1923.

How much has he drawn of public

moneys during the period he has been

employed?

\$15,020.72.

How much of this has been salary

and how much expenses?

Salary \$10,269.65; and expenses

\$4,811.04.

How many claims have been heard

and how many decisions given?

528 Claims have been heard, aggregating \$31,295,619.39 but no decisions

have been given.

Questions re Canada Colonization

Association; answers by Hon. J. A.

Robb:

What was the number of families brought to Canada during the year 1923-24 by the Canada Colonization Association?

Thirty-five settlers; no record as to

actual number of families.

What amount was paid to the Canada Colonization Association during the said fiscal year?

\$100,000. Or \$2857 per settler.

SLIP-SHOT TAXATION METHODS

If Ottawa is determined to stick to the iniquitous, demoralizing income tax system, some provision must be made to make that tax effective against 100 per cent. of those who should pay.

At present there are some 25,000 accounts carried in the local income tax office. With only four ledger-keepers to look after them, they are necessarily six weeks to two months behind. More than twenty girls, moreover, are receiving less than the minimum wage law calls for.

Ottawa's policy of curtailing Dominion expenditure is commendable. But surely it is a stupid policy that starts in to curtail the revenue-producing departments of government if economy is to be practised it should start in curtailing the spending departments of government.

A few years ago in British Columbia the man who paid taxes was regarded as a "sucker." The staff was so small and so little attention was paid to taxes that about one out of ten was paying them.

That may have been all right in those days. But today, with the tremendous tax burden the country has to meet, the tax-collecting department should be one of the most important branches of government.

And, unless it is speedily made one of the most important and best-equipped branches of government, the public can only conclude that it is Ottawa's intention to confine the collection of taxes only to those who must or will voluntarily pay.—Vancouver Sun.

PRIZE IS OFFERED

FOR MODEST DRESS

Pope Pius, having heard of the campaign inaugurated by the Catholic Women's Diocesan Club against immodest dress for women, has decided to offer a medal to the club evolving the most attractive modest fashion in women's clothing.

The contest for the medal is divided into two sections, a theoretical section devoted to the most effective demonstration that immodest dress is really silly, barbaric and uneducated, and a practical section devoted to the actual designing of attractive fashions designed to appeal to good taste.

"WILD" HORSE ROUNDUP

What appears to have been one of the biggest farces that has ever been pulled off in this district is the recent roundup of "wild" horses. What the cost of this has been can only be estimated, but one thing is sure, and that is that it cost too much at any price.

If the roundup had been put on for the benefit of the farmers, and not one or two horsemen who have no right to this range, it would have been different. As it is a big corral costing in the neighborhood of six or seven hundred dollars was built at Twelve Mile Coules and used for three days to cut out Mr. Bollen's horses, so it is reported to The Bulletin from reliable source. The rest of the horses were sent to the C. P. R. pasture, south of town, and farmers told to come and cut out their own stuff and pay the sum of \$2.50 per head.

While things were dragging on a big crew was being paid. Then it was figured that glanders had set in among the horses and Government Veterinary Surgeon Hargrave made a test of the horses on July 3rd. There was no sign of glanders, we are told.

Farmers and horsemen are indignant at the procedure.

There was not one wild horse in the roundup. They had been turned out on the range by farmers of the district and had all been broken.

We would suggest that next year the government put on a roundup for J. A. Morrow of Patricia, or at least someone residing in this district.—Brooks Bulletin.

MORAL CLAIM RECOGNIZED

OTTAWA, July 17.—The long advertised debate on the claims of the Home Bank depositors for reimbursement took place in the House of Commons tonight and lasted less than two minutes. In fact, there was no debate. Nevertheless, the House of Commons committed itself to the provision that the "depositors of the Home Bank have a moral claim in equity for compensation by the country on account of any loss they may have suffered by reasons of the failure of the Home Bank."

The subject was called up by Premier King—as soon as the House resumed its evening sitting. Thomas Vien, chairman of the banking committee of the House of Commons, moved a compact resolution that the House concur in the report of the committee. The essence of the report of the committee was the sentence quoted above.

As soon as the speaker had put Mr. Vien's motion to the House it was followed by him saying: "Carried," with the rising inflection of the interrogative.

There were answering cries from the House of "Carried," with an affirmative inflection, but no negatives made themselves heard.

Mr. Vien kept his seat. There was a pause and a hush of waiting in the chamber. "Isn't there to be a debate on this question?" asked W. F. MacLean, Conservative, South York.

The only answer was again the cry, "Carried."

The speaker confirmed the verdict of the House and declared the motion carried. The debate was over. There was a burst of desk hammering and laughter from all parts of the chamber and with a sigh of relief the members turned to the discussion of the routine estimates of the Privy Council office.

Ireland is now experiencing the "Devadera."

Major McLaren, British aviator, on his round-the-world flight, will land on Lake Wabamun, west of Edmonton, during his flight across Canada.

Bobbed hair is making a rapid exit from London. Women and girls who have had their hair cut short are now anxious to have it grow out again, hair dressers say. Many are now having their bobbed or shingled hair permanently waved to lessen the "bare" effect. There has been a similar reaction in Paris against bobbing.

WEMBLEY WONDERS

Among the strange exhibits at Wembley is one illustrating the use of casein, the basic product of milk. Park, extending for a quarter of a mile, is a perfect replica of a coal brazier handles out of milk is illustrated.

The Stadium is awe-inspiring even actual Buddhist shrine, with the God when nothing is happening within its Buddha in Alabama. Here the Burmese visitors to Wembley abandon the size of the Coliseum and it holds their shoes and worship the pale god under Dr. Harris.

The Burmese Pavilion includes an actual Buddhist shrine, with the God of their people.

Over twenty tons of music are being used by the massed choirs in their concerts. Ten thousand singers perform under Dr. Harris.

Tropical trees, transplanted to the displays its magnificent tusks in the Wembley gardens, are heated by electric Ceylon Pavilion.

The world's first never-stop railway benefits the earth to counteract the severe London climate.

The Aquarium in the Amusement Park uses 50,000 gallons of water brought specially from the Dogger Bank.

Tristan da Cunha, the Empire's loneliest island, has a show in the South African Pavilion. Among its exhibits is a black rail, the bird which has wings, but never flies.

Reports come from the North Fork River of large numbers of dead fish laying on the bottom of pools, evidently the work of dynamiters. It's too bad parties cannot be caught at the Malayan Pavilion.

Actual rubber trees, with the in-such work, but if they are caught it valuable products from their sap would also be a pity to let them off features of the Malayan Pavilion.

Here and There

The value of Ontario's mineral production for the first quarter of the present year, as shown by a report of the Department of Mines, has increased \$2,335,000 over the corresponding quarter of last year. The total being \$11,975,181, and \$9,241,863 respectively. Silver was the only metal of importance to record decreased production during the period under review.

Among the passengers sailing on the Canadian Pacific Lines, Mr. Walker, of England, and Mr. G. E. W. Beatty, Chairman and President of the Canadian Pacific Railway, while in England, Mr. Beatty is scheduled to address the Royal Society of Architects of the World on July 17th on the subject of "Building an Empire with Advertising."

Excellent reports as to the hunting in the Caribou district of British Columbia are being received. P. W. Pridham and Fred Shaver recently returned from a trip to that district with an excellent specimen of grizzly bear weighing about 1,400 pounds. They saw moose, caribou, deer, black bear, pheasants and grouse, and consider the district a hunter's paradise.

Addressing the annual meeting of the Bond Dealers' Association of Canada at Vancouver, Mr. J. H. President declared that during the 12 months ending May 1st, \$507,917,000 worth of Canadian bonds had been distributed. This being far the largest amount in the Dominion in any post-war year. The most striking feature in this connection is that about 89 per cent was absorbed within the borders of Canada.

On June 18th, Winnipeg, Man., celebrated the fiftieth anniversary of its incorporation. From a tiny frontier village of the 70's, Winnipeg has forged into the position of third largest city in the Dominion, with commercial, repute and influence second to none. It is the gateway of the West and 100,000,000 bushels of prairie grain pass through it to the head of the lakes, whence it goes to the markets of the world.

Twenty-five officers and 200 men of the Royal Navy, from the naval service station at Esquimalt, B.C., have enjoyed a trip through the Rockies over the Canadian Pacific lines, while their ships were anchored in Vancouver Harbor. The men, who made the trip, in true naval style, of seeing and doing everything, were enthusiastic over the scenery at such show-places as Banff and Lake Louise, and over the most beautiful they had seen in all their world cruise.

To add encouragement to the return of ex-service men, which is being fostered by the governments of Manitoba, Saskatchewan and Alberta, the Canadian Pacific Railway is awarding a championship to the Boys' and Girls' Sweetie Clubs winning the club competitions in these provinces. The cups will be for annual competition, and will become the property of the club if won for three years in succession. Medals will be awarded individual members. This year winning teams resident on the Canadian lines will be granted a free trip to the Royal Stock Show at Toronto.

INCUBATOR TURNS OUT GAME BIRDS

Olympia, Wash., July 12.—Experiments conducted at the state game farm at Stellacoomon in hatching Chinese pheasant eggs with electric incubators have proved the feasibility of this method, according to J. W. Kinney, supervisor of game. Of 1000 eggs set in an incubator, more than 500 birds were hatched, Kinney reported. Thirty-four hens accepted their sprightly broods when offered.

The chicks waxed strong on a diet of ant eggs and lettuce. The artificially hatched birds were not given grain until nearly seven weeks old, at which time they formed part of a detail of 12,000 pheasants sent to Skagit and Lewis Counties.

There are now about 16,000 birds at the Stellacoomon and Walla Walla farms, with between 12,000 and 15,000 eggs still setting. The farms also shipped about 15,000 eggs to county game commissions and individuals.

The state will have a total output of at least 30,000 birds, Kinney stated, which should be swell to a grand total of about 30,000 by the birds produced by the game commissions.

As far as possible, the hens will not be liberated until after the hunting season, in order that they may raise a brood the following year. Each brood would amount to about 10 birds.

British Columbia's share of the residue of the canteen fund of the Canadian Expeditionary Force, according to the distribution planned in legislation to be introduced during the present session at Ottawa, will amount to between \$180,000 and \$185,000, it is believed by officials of service men's organizations in the province. The distribution to be made of this sum when it becomes available has not yet been discussed to any great extent, but it is regarded as almost a certainty that the final choice will lie between two proposals, the one for education of the children of ex-service men; the other for the establishment of a permanent home for old soldiers.

The Home Bank has suffered many severe shocks, but the latest is to have one of its very good special assets struck by lightning. Recently the South New Orleans Light and Power Co.'s plant, which concern owes the Home Bank upwards of \$1,140,000, was struck by lightning and badly damaged.

RED MILLION AND A HALF

The committee on citizenship of the American Bar Association estimates that there are in our country 1,500,000 Reds.

One and a half million radicals, all the way from red mouthed anarchists to parlor Bolsheviks and socialistic college professors!

These figures are based on detailed returns from the Secret Service department and include the I.W.W. and all constitution overthrows.

It is estimated that \$1,000,000 was spent last year on radical propaganda and that 5,000,000 read radical newspapers and magazines.

There can be no doubt that the world war stimulated the development of lawlessness, and the millions who disregard the Volstead Act and the Eighteenth amendment, swell the armies of discontent.

The radical movement in our country will have to be checked by the common sense and patriotism of the masses of the people and by enactment of less freak laws and better enforcement of all laws.

Prof. John R. Commons, of Wisconsin University, says the wage earners manifest a dogged determination not to accept any cut in wages but that they are less revolutionary than a few years ago.—Commercial and Financial World.

PREFERENCE IN GRANTING IMMIGRATION VISAS

The new U. S. Immigration Act provides for preferences in the granting of visas to quota immigrants to the United States.

There are two preferred classes: viz., (1) skilled agriculturalists and their families, and (2) close relatives of American citizens, for whom specific authorization has been received from the Department of Labor. Agriculture is used here in the larger sense, so as to include persons skilled in grain culture, horticulture, animal husbandry, and forestry; but not everyone who has worked on a farm or handled an axe will be rated as a "skilled agriculturalist." He must satisfy the consul as to his qualifications.

Preferred relatives include unmarried children under 21, father or mother, husband or wife.

The immigration restrictions do not apply to American citizens, who can return to the United States without papers of any sort.

Seventeen hundred persons left a town in Norway last year because they were unable to pronounce its name, which was Kvædstoftefjelletab.

Visiting Sailors Tour Canadian Rockies

Above, some of the sailors are here seen at Banff grouped around the huge Canadian Rockies. Inset—Sailors at Revelstoke.

Through the courtesy of the Dominion Government twenty-five officers and two hundred and twenty men of the British Services Squadron on tour were given a trip from Vancouver through the Rocky Mountains as far as Calgary, by special Canadian Pacific train, returning by way of Edmonton. The men, selected from the Flag Ship H.M.S. Hood, H.M.S. Repulse and H.M.S. Adel-

phus. All through the mountains the train was given most enthusiastic reception by the people in the stations wherever it stopped and shouting their greetings from the smaller ones as it passed. During a stop of two hours at Revelstoke the entire crowd was taken to the top of Mount Stephen, returning to the train at 10 o'clock. All day they were entertained at receptions and banquets, closing the day with a ball at the Palliser Hotel.

heaps flowers and congratulations on their visit. But the sailors met them with automobiles and shot them around at night on arrival and again in the morning when they visited the bathing pools. The reception at Calgary was equally as that accorded the sailors at Banff, and all day they were entertained at receptions and banquets, closing the day with a ball at the Palliser Hotel.

for the day, and a smoke at the hotel for the men.

Throughout the trip the sailors were as busy photographing as being photographed. All of them have cameras and have viewed the scenery of many lands, but they are unanimous in the opinion that the beauty of the Rockies, Banff National Park, and all the other scenes of the tour are more grand by far than anything else they have seen.

Vision as Applied to Railroading

Left—Selecting wools or test of color-sense. Right—Reading types in vision test. Below—Williams lantern, for testing color-sense.

Are you color-blind? Short or long-sighted? Stereoscopic? You may be without knowing it. You may never have tested.

These physical deficiencies, and some walls of the house, little things, may in railroading certain responsible positions require perfect vision, color-sense and hearing.

The examination of aspirants to positions in the Canadian Pacific, conductors, trainmen, watchmen, and others directly concerned with the safety of trains and the periodical re-examination of those already in the service, are the responsibilities of the Canadian Pacific, which provides an outstanding example of the care with which each applicant is tested.

In a special department charged with this work, it is called the Time

Service and Vision, Color-Sense and Hearing Department. There is a Medical Examiner for Eastern lines and one for Western lines, each with a separate office.

All applicants for positions in transportation, which demand a standard in vision, color-sense and hearing, are required to pass an applicant examination and, if successful, receive a formal examination at least every two years thereafter, and, in some instances more frequently, according to the diminution of their vision or hearing.

Those in whose eyes are either directly or indirectly involved and which may have been caused by defective sight, hearing or color-sense, or any disease, or any other injury or illness or severe inflammation of either the eyes or ears, they are again re-examined and, not content with the regulations, the Canadian Pacific requires them to face the examiner whenever they are slated for promotion.

Cautious regard for the public safety could hardly be further than this.

The tests employed are exhaustive and are so arranged as to approach as closely as possible to the conditions likely to be met with in their work by those examined. Applicants for positions as engineers, firemen, conductors, brakemen and others similarly engaged are required to pass the near and far vision tests without glasses. If, at one

time, the eye is the弱眼, the applicant is required to pass the test again, the弱眼 being the one to be tested. The examiner tells him to pick out all the wools which have

red, green or some other color in them or perhaps to read a series of letters.

The man who fails and is found to have a weakness, if he is a conductor, is immediately removed from his position.

In the Williams lantern test the applicant is taken into a dark room.

At one end of the room is a lantern with a revolving disc containing a number of colored glass slides, shades of green, yellow, purple or blue, as well as white. All colors employed by the railways in their signals are included. The examiner asks the applicant to name the colors displayed as the slides pass before the lens. In another test, the弱眼 is covered and the strong eye is required to read a series of letters, the letters being of different sizes, singly or in combinations of two or three, becoming visible. "What are they?" asks the examiner. "White, blue and red," says the applicant. "Light green and dark green," says the applicant, and so on naming the

colors as he sees them.

These wool and lantern tests reveal an astonishing extent the prevalence of color-blindness. Fully fifty per cent of the applicants are color-blind, without realizing it and will not believe it when the examiner gently but firmly points out the fact.

As it is, of course, vital that a color-blind person be rejected, those who are rejected, though they might improve the reading of signals and all applicants for those positions should have an accurate color-sense, no blind person has the slightest chance of passing.

The number of men, applicants and employees, examined on a systematic basis is enormous. The Canadian Pacific is very great. Approximately 15,000 men are employed in the Canadian lines alone, and between 12,000 and 15,000 employees on the Eastern lines come up for re-examination every two years. The cost for Western lines is approximately the same.

It will readily be understood that the entire system would be discontinued if the applicants had to report to the offices of the Chief Examiners for their tests. The Canadian Pacific therefore retains two special examiners, one for the Western lines and one for the Eastern lines, which are specially fitted as travelling-lens rooms and are continually on the move. It takes these cases two years to make the examinations.

What Of Canada's Future?

One day recently the writer of this weekly article read two divergent views of Canada's progress during the past few years. One was pessimistic; the other quite optimistic. Yet there was much of truth in both, although neither writer appeared to take into consideration the effects of the Great War on the progress and development of the Dominion.

The pessimistic note was sounded by Miss Agnes Laut, well-known writer and lecturer. She is not at all pleased with Canadian progress, believes that sectionalism is rife, and that Canadians are not living up to their possibilities.

Declaring that she is frankly very depressed about Canadian conditions, Miss Laut stated that what her country needs just now is a ringing message of optimism, founded on fact, and that she cannot give "all Canada's mental outlook changes toward the world."

"I used to think," continues Miss Laut, "it was economic pressure prevented Canada measuring up to her unequal inheritance of natural material wealth. Now I know it isn't... It is your lack of dedication to the idea in which your nation was conceived and born... 'He shall hold dominion from sea to sea.' Instead of that I see Canadian sectionalism growing." And then Miss Laut dwells on the exodus of Canadians to the United States, and the fact of a population of only nine millions whereas, she says, Canada ought to be a nation of 40 to 60 million, humbling with prosperity that could be had around the world.

The opposing, and more optimistic view is presented in articles appearing in Toronto Saturday Night, which recalls the prediction of the late Sir Wilfrid Laurier that the Twentieth Century would be Canada's Century. Sir Wilfrid made this prediction in the days when Canada was emerging from a long period of halting growth into an era of amazing progress—an era, 1898 to 1910, which even Miss Laut says was Canada's one era of "humming prosperity."

Almost one-quarter of that century has passed, and what does the record show? Toronto Saturday Night finds in the progress of Canada during the last decade a record to compare with that of the Dominion had lived up to its title of being "The Century of the Twentieth Century." It notes that Canada has become in fact, as well as in name, the controlling factor in the world's wheat trade—one of the giants of international commerce. It draws attention to Canada's astonishing advance in the production of pulp and paper; it refers to the extension of Canada's manufacturing activities in countless directions until today the Dominion is ranked high among the industrial nations of the world; it cites the tremendous expansion in trade and commerce to a figure which few business men would have imagined or dared to prophecy twenty or even fifteen years ago.

But what of the future? Unquestionably, and notwithstanding the growth of the past twenty-five years, encouraging in many respects as that growth undoubtedly is, Canada is yet a long way from being the country it ought to be, and Nature, with its bountiful gifts, intended it should be. What is the reason? Is it sectionalism and lack of a great national ideal, as Miss Laut says, or is it the economic pressure of a great and highly organized nation to the south in which Canadians can find a home without the disabilities of an unfamiliar language and customs which most emigrants from one country to another, or is it Canada's somewhat rigorous climate or is there some lack of interest and courage on the part of Canadians in applying themselves to the development of the country's great wealth of natural resources?

It would be idle to deny that there is a certain amount of sectionalism in Canada. The fact of two races, two official languages, two great religious groups, two ground, necessarily tends towards sectionalism. This is further accentuated by the geography of Canada which divides the Dominion into two economic groups, east and west. Time and development alone can fully overcome these obstacles, and they are being overcome. Racial and religious animosities are not nearly so acute as they were a quarter of a century ago.

Notwithstanding the attraction of the United States, Canada's population has increased by nearly four millions since the Twentieth Century dawned, and as the Dominion grows and develops, and opportunities are thereby increased, the attraction of the United States will steadily lessen.

Canadians have displayed courage and initiative, and for a nation of few people scattered over half a continent, have remarkable achievements to their credit. Nevertheless, it must be admitted, that our captains of finance and industry have not exerted themselves as they should, nor taken full advantage of the great opportunities which were theirs to develop and bring prosperity to the country. There is room for vast improvement here.

Canadians should develop a national ideal. They should be more optimistic regarding Canada's future, because, without doubt, the Dominion faces a career, as Toronto Saturday Night puts it, in which the period of economic youth and growth has still a long and promising course to run.

Alberta Natural Gas Development

New Well At Foremost Greatly Increases Output

Well No. 4 of the Canadian Natural Gas, Light, Heat and Power Company, in the new Foremost Field, was brought in recently with a measured output of 20,000,000 cubic feet of gas daily, open flow, according to formal notice given the Alberta Public Utility Board by the company. This makes the well the biggest of the group of four new producers in the field and provides a total supply of gas at Foremost of 49,000,000 feet, open flow measurement.

Lumbering in Thunder Bay District

Timber operations in the Thunder Bay district during the past season were the greatest ever recorded. Contracting corporations and individual parties operating in the timber cut district 334,613 cords of pulpwood, over 1,900,000 cords of logs, 448,521 sawlogs, 19,291 cedar posts, as well as a large quantity of dimension timbers, telephone poles and cordwood.

Cuenca, a city of 30,000 in Ecuador, lies 8,469 feet above the sea.

Canada As A Wheat Exporter

Dominion Is Assuming An Extremely Important Position As A Wheat Exporting Country

That Canada is assuming an extremely important position as a wheat exporting country is strikingly illustrated by comparison with the volume of wheat exports from the United States. Last month, Canada shipped more than 41,000,000 bushels, in comparison with exports of 2,861,000 bushels from the United States. It is also interesting to note that four times as much Canadian as American wheat left American ports last month.

Western Horsemanship For The East

A large movement of western horses to the east is now in progress, according to stock dealers. During March and April, 1,491 horses were shipped from the prairie provinces to Ontario, 1,657 to Quebec, 416 to Nova Scotia, 294 to New Brunswick, 32 to Newfoundland, making a total of 3,239 head of horses shipped east. Of this number, 1,981 horses came from the provinces of Alberta, 817 from Saskatchewan and 589 from Manitoba.

Trans-Atlantic Phone

Soon To Be Tested

British Government Aims to Give Reliable Service With America

The 200-kilowatt transmitting apparatus by which the British Government hopes to inaugurate wireless telephony conversations with America will be completed about the end of August, said the Ruby City manager. At present plans are to have the equipment in operation by October. It is hoped to begin the experiments during the following month or early in October.

Speaking in the British House of Commons, Postmaster-General Hartshorn said that experiments were in progress to test the possibility of establishing commercial telephone wires between England and the United States. "Spannoidic communication," said Mr. Hartshorn, "has been achieved over extremely long distances, but the aim of the experiments which are now being conducted is to give a reliable and continuous service."

Manslaughter In 2nd Degree

Using a razor-blade stuff—but many people do it for their corsets—The only remedy that is painless, which does remove waste and corsets, cleanse them right off... Refuse a substitute for "Putman's" 25¢ everywhere.

Movement of Alberta Wheat

Total of 182,615,776 Bushels Handled In Province By Railways

Railway companies operating in Alberta have shipped a total of 152,615,776 bushels of wheat between September 1 of last year and May 31 of this year. From this must be deducted about 20,000,000 bushels to allow for the quantity received from points in Saskatchewan which are included in Alberta division of the C.P.R., and to allow for duplication in handling of grain coming of branch lines to main transcontinental lines.

THE SYMPTOMS OF IMPOVERISHED BLOOD

Show in Pale Faces, Tired Feeling and Breathlessness

People who are pale, languid, with palpitation of the heart and shortness of breath at slight exertion are suffering from anemia. They may have the inclination to take the right remedy and stick to it, they will find new health and strength. The remedy is Thomas' Electric Oil.

T. Johnson, Labor member for Stirling and Clackmannan, ironically suggested that it would be grossly unfair if those persons who had paid for titles by contributions to party funds if the conferring of titles were to be abolished.

Lord Inchdeuk, Conservative member for the Newark division of Nottingham, asked: "Will it also be taken into consideration that the Premier's life is being made miserable by the members behind him (meaning the Labor M.P.'s) clanging for titles?" This sally was greeted with laughter.

Lord Inchdeuk, Conservative member for the Newark division of Nottingham, asked: "Will it also be taken into consideration that the Premier's life is being made miserable by the members behind him (meaning the Labor M.P.'s) clanging for titles?"

PROGRESSIVES WOULD AMEND THE B.N.A. ACT

Ottawa.—A vote of \$56,000,000 to the Canadian National Railways and another of \$90,000 to the Canadian Government Merchant Marine, to cover the year's bond commitments and deficits, were passed by the House of Commons after several hours debate, in which several Progressive members criticized the Senate bitterly for throwing out some of the proposed branch lines on the Canadian National Railways.

W. D. Eaton (Liberal, Waterloo), as chairman of the committee on Canadian National Railways, was in session, reviewed the work of that committee. He expressed increased confidence in Sir Henry Thornton, and the country should assist him in every possible way and hold him responsible for the welfare of the system. The system was constantly improving, and a large measure of the service which had been the object of the purchasers of the Canadian National Railways was now secured.

C. D. Stewart (Progressive, Humboldt) urged that a considerable sum should be placed in the supplementary estimates for the purpose of conducting further surveys of the branch lines killed by the Senate. He felt that lack of information was one of the reasons underlying the action of the upper house. It was unfortunate, he said, that certain bills providing for branch lines met an ill-fated fate elsewhere. Mr. Stewart made an appeal for fair treatment of the Canadian National Railways.

C. Davis (Progressive, N. Battleford) deplored the efforts he said were being made "in other places" to discredit the Canadian National Railways. "Democratic government in this country is nothing but a screaming farce," he said. Settlers were invited to spend 19 years or so on the land, and then "certain people" could say whether or not they should get a railway. The Government should see that the branch lines would be built, not only what was objected.

Hon. G. P. Graham said these things could only be done in a constitutional way. "It was not my opinion that the branches turned down by the Senate could be built this year, unless the B.N.A. Act were changed. There was a chorus of shouts from the Progressive benches: "Let us change the B.N.A. Act then."

Revival In Grain Trade

\$1,000,000,000 Added To U.S. Wealth By Grain Advances

Chicago.—Upwards of \$1,000,000,000 has been added to the agricultural wealth of the country as a result of grain advanced in the last month, local grain men estimated.

There has been such a revival in grain trading as to show at time in many years. Foreigners are said to have bought upwards of 25,000,000 bushels of wheat futures in Chicago and Winnipeg within a short time.

All cereal futures, except September corn, were quoted here at new high prices for the crop, with wheat closing at 130% for the July future; September, 129%; and December at 132. Strength at Winnipeg was a contributing factor in the advance.

New Grain-Shipping Scheme

Edmonton, Alta.—Full particulars about the new grain shipping scheme that Hon. George Howard brought back with him from England were reported by the minister to H. W. Wood, chairman of the Alberta Wheat Pool. Involved in this scheme is a system of grain storage in government elevators in England, and wheat from Alberta, shipped via the Panama Canal, will be especially concerned.

Will Not Change Bankruptcy Act

Ottawa.—The Government does not contemplate bringing in any further legislation this session, said Premier King in the House of Commons, answering a question as to whether or not the amendment to the Bankruptcy Act recommended by the Banking and Commerce Committee would be before the House this session.

Will Issue New Note

Berlin.—The bill for establishment of the new note bank will have been completed and submitted to the Reparations Commission under the plan of reparations experts' committee.

The Government will issue a so-called reichsmark noted at the face value of ten marks and upward.

Would Close Hostels

New York.—Assistant United States Attorney Lyman H. Ward announced he will seek an injunction to close for one year the Ritz Carlton Hotel, a world-famed establishment, on the ground that this hostelry is a commercial nuisance.

British Millers Forced To Advance Price Of Flour

London.—The sixth increase in the price of flour since May first is blamed upon Canada. Gambling in wheat futures is said to be responsible for the rise, together with the expectations for a late and smaller crop this year. English millers declare that they are forced to raise the price to meet the increase in the price of wheat, which is, they say, the direct result of manipulations on the Chicago and Winnipeg grain exchanges. Since the beginning of May the price of flour has advanced more than six shillings a sack.

Alpine Club Will Camp In Rockies

Canadians Expect Members From England and U.S. to Attend

Whistler.—The annual meeting of the Canadian Alpine Club will be held at the foot of Mount Robson, monarch of the Rockies, on Thursday, July 31, according to information reaching the Alpine Club camp opened this year on July 22, and will close on August 4, and it is expected that about 150 persons in attendance, a number will be from Winnipeg and other Western Canada points.

Outlying camps are to be placed at the base of the Coleman Glacier and on Calumet Creek, to give access to Moose Pass and the uplands surrounding this region. A camp will also be placed at timber line on Mount Robson, in charge of Conrad Cain, celebrated guide, who led the ascent of Mount Robson in 1913. This high camp will be for the purpose of facilitating attempts to reach the peak of this, the highest mountain in the Canadian Rockies.

It is anticipated that one or more members of the Alpine Club of England will be in attendance, and large parties are expected to be present from various United States points. The climbers will go from camp to Mount Robson station, which is on the main line of the Canadian National Railways.

Postal Employees' Troubles

No Change in Terms of Reinstatement

—Has Been Made

Toronto.—No change in terms of reinstatement of the postal employees who went out on strike was made as a result of the visit of the Postal Federation officers at Ottawa, it was announced when the officers returned to this city. The executive of the federation will hold a meeting at which the officers' report will be discussed.

"There is no change," said one of the officials, and there is nothing to be said at the present time.

"There's a possibility of further trouble?"

"I can't say. There is nothing to tell at the present time."

Believe Coast Indian Victim Of Foul Play

Well Known Chief of Squamish Nation Dies at Vancouver

Vancouver.—Chief Jimmy Harry, one of the best known chiefs of the Squamish Nation, is dead, and police are investigating the possibility of foul play. The Indian was picked up in the east end of the city in an unconscious condition from head injuries and sent to the hospital. Recently an award of more than \$8,000 was made to the Indians of Chief Harry's reserve by a bridge construction company for use of reserve property and police believe that robbers attacked the Indian hoping to find a sum of money on his person.

Plan Reception For Squadron Crew

London.—A movement has been started and is receiving encouragement to have the crews of the special service squadron take part in a triumphal march through the streets of London in order to give citizens of the empire metropolis an opportunity of welcoming them after their tour round the world.

\$5,000,000 For Vancouver

Ottawa.—The bill providing for advancing \$5,000,000 to the Vancouver Harbor Commission for work on terminal facilities was given third reading in the House of Commons. The Toronto "Vladuit" Bill also received third reading after considerable discussion.

May Test New Treaty

Boston.—The liquor treaty recently signed with Great Britain under which a vessel carrying liquor, and within four hours' steaming distance of the United States coast, may be seized, is expected to be tested as a result of the capture of Raft No. 10 of the Canadian schooner Frances Louise.

May Be Election Issue

Immediate Completion of the H. B. Railway Will Be Demanded

Winnipeg.—"The Government's decision regarding the completion of the Hudson's Bay Railway, as given out by Hon. George Graham, most assuredly shows that it has not gone back on the Laurier-Greenway decision that the railway was a decided factor for the benefit of Western Canada as a whole, and that Mr. Graham still hopes to have the honor of driving the final spike."

This is the opinion of the executive of the Hudson's Bay Association, as voiced by Col. R. H. Webb here.

Col. Webb commented on the Government's small majority in the House at present, and declared:

"We know that if the situation remains unchanged the next election will be fought in the west on the issue of the immediate completion of the Hudson's Bay Railway, and by a solid western party, which will be pledged that the west shall have the railway completed. It will not be a Progressive or a 'western party' that will insist on having its policy carried out to the letter."

Col. Webb said the association would call a general meeting to determine its future policy shortly.

THE SENATE HAS FINISHED WITH BRANCH LINES

Ottawa—The Senate Is Held Responsible For Branch Lines

—Held Responsible For Branch Lines

Local and General Items

J. P. O'Neil is sporting a new Oldsmobile Six Roadster, purchased from Fumigall Brothers, Hillcrest.

Perhaps it isn't significant, but a woman is usually more patient with fools after she has been married for a time.

Mrs. McFarlane, of Calgary, is visiting here with her parents, Mr. and Mrs. Baird, and her sister, Mrs. W. J. Fisher.

Calgary will next year celebrate its fiftieth anniversary with a grand jubilee in connection with the fair and stampede.

Some of our townswomen are so modest that they won't wear calico because they don't want to see themselves in print.

Roosevelt once remarked: "Show me a man who makes no mistakes and I will show you a man who doesn't do things."

Now is the time to preserve APRICOTS.

Blairmore Oddfellows and Rebekahs held their annual picnic at Crows' Nest Lake yesterday and were joined by a number of members from Coleman.

A Michigan mayor, a former police commissioner and a police lieutenant were sentenced to two years each in a federal prison for selling "real" beer.

Three hundred motors cars were registered in the United States in 1895. In 1925, thirty years after, the number will be in excess of sixteen million.

The Brooks Bulletin suggests that the big corral built there for the recent roundup of would-be wild horses, should be moved to Edmonton for a roundup of wild ideas, wild men and wild women.

William R. Welsh, formerly connected with the Maple Leaf Collieries at Bellevue, but now operating a mine at Standard, Alberta, is spending the week in The Pass renewing old acquaintances.

Now is the time to preserve APRICOTS.

Hugh McMillan, popular proprietor of the Crowley Hotel, was taken seriously ill early last week. We are pleased to report, however, that he is fast recovering and hoped to be out and around this week.

Mr. Ubertino, late proprietor of the Orpheum Theatre here, who has purchased the Palace Theatre at Cardston, has also taken over the Colonial Theatre at Lethbridge, which will be thoroughly renovated. The Colonial is well located and should attract good business.

We read of all kinds of high jumps, but the highest jump we ever heard of was made by a green-horn auto owner who lighted a match to look into his gas tank. He promised to report to us immediately upon his return to terra firma and gosh we are tired waiting!

Of one crop we are already assured a large yield, even if the season is late in other lines—the fool in charge of a car. He is never travelling faster than fifteen miles an hour if he has an accident, but boasts of forty, fifty and sixty miles an hour when he can get away with it.

Now is the time to preserve APRICOTS.

A Los Angeles car with the number 1,100,844 was in Amherst, N. S., on June 26th enroute to Truro.

Geo. D. Quail, of Fernie, was a Blairmore visitor on Tuesday and Wednesday.

Mr. and Mrs. Evan Morgan and children have returned from a motor trip through the Creston valley.

J. S. Kirkham is applying for a hotel beer license at Lethbridge.

Mar Poy was a business visitor to Etzikom and Lethbridge during the week.

The Lethbridge Elks will stage a jubilee and fun festival July 29th to August 2nd.

FOR SALE—Two houses and lots, on Fifth Avenue South, Blairmore. Apply to C. Drury. Au. 14

Lord and Lady Byng will spend eleven days touring through the Kootenays before reaching Blairmore on August the 8th.

An exchange says: "Economy does not consist in using 82 cents' worth of gas to find a store that sells the thing for 16 cents less."

The oldest residence in Cardston was built by O. Card in the year 1887 of logs and is still occupied and in a good state of preservation.

If you bought all your goods in the home town and I did the same, and everybody followed suit, what a splendid town we would have.

S. Knappman and family returned on Sunday last from Lethbridge, where they had been visiting friends for a few days and incidentally taking in the annual fair.

Mr. and Mrs. G. A. Vissac and party of friends were week end visitors to Waterton Lakes, where Mr. Vissac was successful in landing a four-pound speckled trout.

Now is the time to preserve APRICOTS.

Mrs. J. D. Matheson, of Macleod, is spending a vacation with friends in Nova Scotia. Before returning, she will visit New York and other States' cities.

Prohibition received a hard defeat in the Saskatchewan elections on the 16th. The retail sale of beer was also defeated, all liquors to be sold under government control through vendors.

The Edmonton Commercial Graduates basketball team won the European and world's championships at Strasbourg, Alsace-Lorraine, on Saturday last, by defeating Strasbourg 37 to 8.

Marie, twelve-year-old daughter of Mr. and Mrs. O. Wood, of the Union Bank, Macleod, was drowned in the Old Man River near Macleod, last week while attempting to swim across the river.

At the preliminary hearing of Loeb and Leopold at Chicago, charged with the murder of fourteen-year-old Robert Franks, both pleaded guilty. Evidence as to the sanity of the lads is to be taken before sentence is passed.

A large number of houses were purchased from the Hosmer Coal Co. last week by residents of Blairmore and Coleman and are being unloaded and prepared to re-erection. Messrs. Kubik will erect several cottages in Blairmore.

British Columbia's liquor imports netted the public purse of the Dominion by the way of customs duties alone \$4,779,110 in 1922, and \$5,603,167 in 1923. In addition to this, excise duties on foreign liquor imported totalled \$6,721 for the two years. On domestic spirits and malt liquor, excise totalled in the two years \$908,745.

ROLLIN CARS & WHITE TRUCKS

A new lightweight car, small displacement, high compression, 4-cylinder, European type motor, 4-bearing crankshaft, four-wheel brakes—internal expanding, non-movable rims, balloon tires, forced feed lubrication to all rotating motor bearings, 25 to 30 miles per gallon of gas.

We have been appointed Crows' Nest Pass Distributors for the above car. Call or send for large folders giving specifications and further information.
